A MESSAGE TO THE ALUMNI

Dear Alumnus/Alumna:

We are pleased to present this, the 6th edition of Alumni News. Its purpose is to keep you in touch with the department as well as with your former classmates and friends. We hope that you find each year's Alumni News to be an improvement over previous editions, and we encourage your comments and suggestions toward this end. We also ask you to keep us posted concerning your own job and/or address changes, as well as those of any classmates of whom you might be aware. With your help, we hope to eliminate the designation "address unknown" from next year's list of alumni.

Several of you have dropped by, phoned, or written to us during the year, and we deeply appreciate these contacts. We are eager to keep in touch and welcome--among other things--your assessments of the extent to which we prepared you adequately for your professional careers. We're always open to suggestions!

A word of thanks is due those who helped in the production of this Alumni News: Ken Tichacek (graduate assistant), Barbara Hartman, and Jane Terry (members of the department's clerical staff).

May your year be happy and productive!

THE YEAR IN REVIEW

(by Mike Brooks) The spring 1977 semester began with 60 students in the undergraduate program (down--by design--from 78 a year earlier) and 68 studying for the M.U.P. degree (compared with 71 the previous year). The 34 students currently spending their first year in the graduate program were selected from 153 applicants, and came here from 27 different colleges and universities in 14 states and two foreign countries.

A significant change in the Department this year was the absence of Lou Wetmore and Scott Keyes, both having retired at the end of the 1975-76 academic year. Both left substantial imprints on the Department, and they are missed by all who knew them and worked with them. Fortunately, however, they have remained in the Champaign-Urbana community, and occasionally drop by.

About a year ago we began an extensive search for a new Director of the Bureau of Urban and Regional Planning Research, and--as is often the case--finally concluded that the best person for the job was already on the scene. The choice: Carl Patton. Assuming the position as of January 1977, Carl is working diligently to expand the Bureau's research and public service programs. As a part of this re-organization, John Quinn has been appointed Assistant Director of the Bureau, with specific responsibility for its continuing education program. Look for greatly increased visibility for the Bureau in the months and years ahead!

Carl Patton and Andy Isserman were recently promoted to Associate Professorships, and granted tenure at the University.

Two additions were made to the faculty this year. John Kim joins us from New Jersey, where he recently completed his Ph.D. in Planning at Princeton, in addition to spending the last five years with the Middlesex County Planning Board. John teaches in the areas of land-use planning, transportation planning, regional planning, and quantitative methods. Barry Checkoway will soon receive his Ph.D. from the University of Pennsylvania (in History), and came to Urbana following a year on the planning faculty at Berkeley. Barry's teaching areas include urban history, community development, social planning, and citizen participation.

There have been few changes in the curriculum since last year. This May we will graduate our last class of B.U.P. recipients; subsequent classes of undergraduates will receive the new B.A.U.P. degree. (See last year's Alumni News for a description of the differences.)

At the graduate level, the faculty was organized this year into a number of Curriculum Sub-committees; these groups have been hard at work developing guidelines and recommendations for students concentrating in such areas as land-use planning, environmental planning, historic preservation planning, regional planning, social planning, and transportation planning.

With regard to the Ph.D. program--well, we're still working on it. Our proposal for a new doctoral program in Regional Planning, to be carried out in cooperation with the Department of Landscape Architecture and other units, is currently wending its way up the approval channels. Maybe by 1979?

THE FACULTY

Lachlan F. Blair

In recognition of Uncle Sam's 200th, I gave a course in the eight-week 1976 Summer Session on "Planning for Historic Preservation." On top of the customary lecture-field trip-discussion format, we did an intensive three-day workshop study in Bishop Hill, Illinois. Although tiny, that 1850's Swedish utopian settlement is surprisingly complex and proved to be a delightful revelation to 16 students and their mentor. An 80-page report will soon be published.

The fall term had repeat offerings of the Urban Design course and a Historic Preservation Workshop. Client and sponsor for the workshop was the Decatur Architectural and Historical Sites Commission, set up following our workshop study there two years ago. This time, a team of six students prepared a comprehensive county-wide Historic Sites Atlas and conducted case studies of design control in two several-block sections of Decatur's 400-acre historic district. A thick well-illustrated report has been delivered, both in meetings and in a half-hour cable TV show.

A request from the Illinois Arts Council has expanded the range of my planning interests. In addition to some consulting assignments, we staged a statewide conference on "Planning for the Arts" at Normal, Illinois, in December. Cultural planning is an expanding field of opportunity within our profession. Three MUP's have undertaken their master's projects in this still-to-be-defined specialty this year.

Our Annual Winter Conference this year was on Historic Preservation, and kept me pretty busy through the Christmas break. The bitter weather held the crowd down, but the content was excellent and a Proceedings is now in the works. The 1978 Winter Conference will focus on Cultural Planning, and I'll have something to do with that.

After wrestling with zoning cases, PUD's, roads through parks, and school closings as Chairman of the Urbana Plan Commission, I've gotten one of my spring term classes involved in the local scene to test something the official agencies haven't tried yet. A workshop section of ten students is tackling a regional Capital Improvements Program for Champaign County. Presently overwhelmed by nearly 500 potential projects, they are learning much, and should contribute a bit to intergovernmental coordination. We'll see.

Our grandson Jonathan, approaching three, grows too fast and too far away. Our daughter Marilyn, now with a B.S. in Geology, is enjoying nature as counsellor in a conservation school on the Coast of Maine. She'll be on the Isles of Shoals this summer. Mary and I revisited the Bluegrass country in the Spring, and are planning several historic sites treks this summer. Next fall, a collaborative workshop with landscape architecture and architecture, on small town history and preservation, is beginning to shape up.

Next year will be our first for students coming out under our new upper division undergraduate program. I haven't had time yet to miss the Freshman class

we don't have nor the Sophomores we won't have next year, because I'm busy handling admissions for Juniors. We are aiming at a ceiling of 30 students each in the Junior and Senior years, and I'm quite pleased at the caliber of those coming in. We need some better means of giving recognition to our undergrads--those that do more than is required. Several have won fellowships, others serve on campus committees or official city commissions, lead campus organizations, write for the DI, or play on athletic teams. As the commercials say, "At DURP, we're involved"; and my impression is that our planning students are influential out of proportion to their numbers. Which is good.

When I wear my hat as Placement and Internship Coordinator, I am deliberately optimistic, even though there are some signs of a poor market for planners. I am very grateful for the leads and suggestions that come in from you alumni. We try to pass them on quickly so that our fine young people can get started in your footsteps. Keep us in mind, please. We ought to have 50 to 60 internships each summer; in 1976 there were about 35, more than ever before, and that was in a "bad" year.

Michael P. Brooks

Another fun-filled academic year is nearly over, and it is time again to extend warmest greetings to our growing body of alumni(i)(ae). I hope all of you are prospering, and have happy memories of your association with the University of Illinois.

Several "outside" activities have served to keep my schedule rather complicated this year. I will soon complete my stint as President of the Association of Collegiate Schools of Planning, which has entailed attendance at several national and regional meetings, a fairly sizable volume of paper-pushing, and major involvement in some political issues which are currently "hot" within the planning education fraternity. (As I observed last year in this space, the University of Illinois is the first planning school to have had three of its faculty members in the ACSP presidency, Lou Wetmore and Bill Goodman having held the post in previous years.)

In a weak moment I agreed to serve as Program Chairman for the 1977 AIP Conference, to be held in Kansas City in October. I am already learning why the previous performers of this task often looked like basket cases by the time the Conference was held.

Early in the year I completed editing (with the help of three able research assistants) the Guide to Graduate Education in Urban and Regional Planning, which tells almost everything one could possibly want to know about eighty U.S. and Canadian graduate planning programs. Prepared under ACSP auspices, the Guide was published and marketed by ASPO.

I also continued my membership on AIP's National Education Development Committee, the body which grants "recognition" to the nation's planning schools. At the state level, I was a member of the Education Subcommittee of the Illinois Chapter of AIP; this group is currently conducting surveys to determine the extent to which employers are satisfied with the products of the state's several planning schools (always a lively topic). I also continued my service as

an AIP Examiner (even though I find it increasingly difficult to believe in the validity of the examination which we administer).

Locally, in addition to remaining a member of the Board of Directors of the Champaign County Development Council, I was appointed by the Chancellor to be the University's representative on the Champaign-Urbana Study Commission on Intergovernmental Cooperation. This commission, created by the two mayors and chaired by Sam Gove, is charged with the task of finding ways in which the two cities might combine some of their functions; a further assignment, however, is to "test the water" for another attempt at merging the two cities. The idea makes great sense to me--but I'm not holding my breath.

On the teaching front, I continue to offer planning theory and social planning courses--and continue to long for the time needed to move into some other areas as well.

Shirley's campaign last November for the post of Champaign County Clerk of the Circuit Court was unsuccessful--though with 44% of the vote, she fared better than any other Democratic candidate for this office in recent history. She actually carried the City of Urbana, which subsequently encouraged her to launch another campaign, this time for the Urbana City Council. I am writing this one day after the election, and I am sad to report that this effort too resulted in a narrow defeat. East Central Illinois is still solidly Republican country! For now, then, Shirley will rest content with her position as Administrative Assistant to the Champaign County Auditor.

With the return of spring, my thoughts inevitably turn to tennis--and to the matches which I have played with some of you. In closing, then, let me encourage all of you to visit us when you are in the area--and bring along your racket!

Barry N. Checkoway

As a faculty newcomer this year, I know few Illinois alumni and thus will take this chance to introduce myself. I have come to Illinois via faculty positions at both the University of Pennsylvania and the University of California at Berkeley, and I have brought with me four courses that suggest my current concerns: "Urbanization and Community," "Citizen Participation in Urban Planning," "Evolution of Cities," and "Community Planning Workshop." It is difficult for me to reduce my interests to a few words, but for now I am interested in research and practice aimed to democratize the planning process.

Welcome to Urbana! What were your impressions of Urbana when you first arrived? My wife Margie, daughter Amy (two years old), and I are pleased with our decision to move to the heartland of America. It may seem surprising to some, but after several years in Philadelphia, Boston, and San Francisco, we are refreshed by the more intimate aspects of life in a smaller place. We miss large cities and were stunned by the severity of the winter, but as I write this it is a warm, sunny afternoon in early spring and it feels good to be just where we are.

Clyde W. Forrest

1976-77 has been moderately eventful. Last year, I announced with a somewhat blasé attitude that I would be president of an elementary school PTA. Little did I realize the amount of work and the controversy awaiting in that position. It appears that our elementary school--an older area of Urbana (Leal)--was to be considered for closing along with another elementary school located approximately 1/2 mile to the east of Leal--Weber. Based on a rather unsatisfactory experience and a reiteration of the known fact of educational independence from planning, I am now becoming involved in a major research proposal to achieve integration of educational facility planning and urban planning. It appears to be an open field for research.

Several assignments in zoning litigation occupied small portions of time and kept me attuned to the reality of nonplanned zoning regulations and a somewhat less-than-sympathetic judiciary in Illinois. Coursework continues in UP 378 with a general inclination to offer this course each semester in order to reduce class size to allow more discussion and interaction. Based on partially self-imposed necessity of three students in the Fall of '76, UP 378 - Law and Planning Implementation is being prepared as a correspondence course.

Completed one consultant project with the Illinois Department of Transportation on Model Land Use Regulations for Flood Plain Control. The family is settled in for another springtime in Central Illinois with our allergy tablets in hand. The Summer Institute on Zoning and Planning will again attempt to draw law, planning and zoning concerns together for the benefit of local decision makers. In June, I will present a paper at the University of Iowa Conference on "The Environment and Agriculture Medicine - Land Use Aspects of Environmental Hazard Minimization." WOW! Time is also being spent on an Illinois Bar Association Committee which is proposing recommendations for reform of the Illinois State Legislative Process. Two publications were completed during '76 entitled, Introduction to Zoning Law in Intergovernmental Planning: Approaches to "No Growth" vs. "Growth Is Good" Dilemma and Organizational Prerequisites for Land Use Planning to Integrate Public Services in Aspects of Planning for Public Service in Rural Areas, North Central Regional Center for Rural Development, Iowa State University, Ames, June, 1976.

Eric C. Freund

What? ... It can't be! ... It is time for another Newsletter? If you say so ... but it really only seems like yesterday when I was writing the last one! I suppose that the apparent swift passage of time is a measure of how busy I have been since last summer (or a symptom of advancing age I hear a small voice whisper!). True--I have advanced several steps nearer to being the most senior member of the faculty since Scott Keyes and Lou Wetmore retired--but, luckily, my illusion of eternal youth is prevented from being shattered by the omnipresence of Bill Goodman who, at least until his retirement, will ensure that time stands still for me.

Having written this, I am sure that I have been busy! Last summer flashed by with a very busy schedule in Britain where, among other things, I was gathering materials for a new course, Comparative Historic Preservation: Europe and the U. S., which compared and contrasted the philosophy and practice of

historic preservation on the two continents illustrated by practical examples from each in depth, complete with plans, specifications, and "before and after" slides--even sounds in the case of a restored watermill! I met many enthusiastic and skilled people in that field including one specialist in the manufacture of products for the preservation of timber and old structures with whom I used to work on restoration projects. He is now the senior partner in a large firm which holds a virtual monopoly on the treatment of cathedrals, churches, colleges, and other large old buildings in the UK, as well as many smaller gems of architecture. He is also working over here and tells me that he recently examined and reported upon the condition of the stonework of the Capitol in Washington, D. C. He has promised to plan an itinerary of interesting jobs for my visit to the UK this summer--an event to which I am looking forward with keen anticipation. It sounds trite--but it truly is a small world when it comes to skilled specialists!

I also had fun examining at first hand the early results of the implementation of the Community Land Act whereby the government prohibited many types of development from being carried out by other than government agency--one more attempt in the long parade by government to take unto itself "the undeserved increment" otherwise known as "betterment," or the escalation in value of private property due to the expenditure of government (public) monies. Many questions remain to be answered. Can persons skilled in control suddenly acquire entrepreneurial expertise in land assembly and imaginative, profitable development? Will government, which has the power to change zoning categories and to exercise control over land development, be more lenient to itself when it finds an opportunity to make a profitable killing through second grade development? Can government officials remain honest when they have a virtual monopoly over the development function? The returns are still not in--but meanwhile the relentless pressure of a failing economy has forced the government to cut back funds for the purchase of ripe land--so maybe we will go back to square one again in due course!

Another area of exploration was in the field of social development, where I revisited several old friends who are social development officers in new towns, responsible for the social, as opposed to the physical development of the towns. This is an area which has intrigued me for some years, especially since the approach is mainly empirical, and the outcome is so vital to the physical and mental well-being of the inhabitants, not to mention the ultimate economic well-being of the new town. I have on my desk a pile of notes and tapes in such profusion that they dare me to make a publication of them!

During the summer of 1976 I was invited to bring my two workshops (combined) for the Fall 1976 and Spring 1977 semesters to Park Forest South to carry out research and studies which would be used in the development of the new town. As you know, the developer of the community went bankrupt, and HUD has taken over in accordance with its guarantee commitments. Luckily, and uniquely in new town experience, the town has incorporated, and the Village of Park Forest South is coterminous with the boundaries of the new town. Part of our deal is that we are made privy to all important political and managerial matters affecting the Village, so that we are able to take part in a meaningful way in advising on policy in many areas. In return for this expression of confidence we have agreed to maintain confidentialities, and work in many ways as if we were the planning staff and consultant to the Village. Needless to say, the course is quite popular as it puts participants in a realistic work-related

situation where much can be learned at first hand. We have agreed to go back for a semester after the summer to carry on with the good work. We are now working with data that we collected last semester and, generally, have started reaping the benefit of our accuracies and inaccuracies--in marked contrast to the semester-long projects where all the studies vanish into the undergrowth to be lost forever. For those that do not know, Park Forest South is about 30 miles south of Chicago, and adjacent to Park Forest, new town of the late '40's.

In addition to the foregoing, I have been involved in planning studies for the development of the State Capitol Complex in Springfield, have taken part in several short courses in the areas of historic preservation and land use policy and control, both on and off campus, and am now preparing for two involvements with the University of Wisconsin-Extension. I am also involved in an advisory capacity with a municipality, a regional planning commission, and with a Department of the State of Illinois. In addition, I still have an itchy typing finger which has produced a chapter in a book (and is producing another); an article on land-use policy and control which has circulated internationally and been used at an international conference in the U. S.; and a couple of articles which have received wide circulation in the U. S. on national land-use policy and control.

What else? Oh yes! In the spring break I drove out East to visit friends and also examples of adaptive re-use of historic structures in New Jersey, New York State, and St. Catharines, Ontario. I also drove through a sufficient number of blizzards to assure myself that a front wheel drive Fiat 128 really does have more traction than a 1963 Plymouth Fury, and that I am still capable of foolhardiness in driving alone through the night in a blizzard from near Toronto to Urbana non-stop apart from taking gas on and letting water off! Maybe as I get older I will gain in common sense!

In my personal life I am slowly picking up the threads again after the loss of my dear wife, aided very substantially by friends on the faculty and elsewhere. I can now manage the house and cook without too many disasters to damage food, utensils, or my inner workings. If I need advice, I have excellent counsel at hand in the form of my son, Adrian, who is quite an expert gourmet cook. With the aid of my telephone and a long extension cord he can hover over my kitchen stove with me to direct operations most successfully! He is also a model railroad buff, and I now find myself buying brass locomotives from time to time ... maybe some time I'll acquire a layout to run them on. Well, if President Corbally does it, why should't I?

In addition, Adrian's a darned good natural resources planner with Dane County Regional Planning Commission in Madison, Wisconsin, and is able to give me counsel from time to time on things environmental, as recently when I was involved in overhauling our curriculum for the Environmental Planning concentration. For news from him, you'll have to look under the BUP's of 1972 where he usually pens a few words. If you detect a certain amount of parental pride in my references to him, you're on the right track and it's well justified. It's been great to have him around in recent years. For those of you that are childless (and married, I hasten to add!) I can thoroughly recommend sons! To save myself from the label of "male chauvinist" I would note that although I have never had one, I am sure that daughters are very good too. I married one and she was wonderful .....

And now for the future. The semester will soon be over--the office is already calling for details of text books for the Fall semester(!)--and all too soon I will be boarding a plane for Europe to gather up more goodies to unload on my student friends yet to arrive at this university. This year I will also be spending a goodly time over here to revisit old places and to discover new ones, especially if they've been historically preserved! I've also been invited to Sweden, Holland, and the Channel Islands--but you can't visit everywhere! I'll promise to give you a full account of my travels in the 1978 Newsletter. Meanwhile, what about a few words from those that know me? I'd like to hear from you if you've got a few moments!

William I. Goodman

Since publication of the previous Alumni Newsletter, the following occurrences can be cited:

1) Continuation of the Office of Transportation Research (under the Vice-Chancellor for Research), in which I serve as Director on a half-time basis. A study of rural transportation systems in Illinois got underway in January 1977, with the participation of faculty from Urban and Regional Planning, Civil Engineering, and Mechanical and Industrial Engineering, together with several graduate assistants.

2) I was invited to Tehran, Iran, in July 1976 to serve as an evaluator of a project being undertaken by the Harvard Institute for International Development, under contract to the Government of Iran. In common with evaluators from Harvard, Australia, Munich, and Cambridge, England, we examined and analyzed staff work directed toward a metropolitan growth and transportation plan for Tehran, in the light of Iran's national needs.

3) I am serving as an advisor to the U. S. General Accounting Office, looking at how the United States government undertakes multi-modal transportation planning and formulates transportation policy.

4) I attended a number of conferences dealing with transportation and with land use problems, and chaired panels for the Urban Mass Transportation Administration in Washington and for the University of Illinois at the Chancellor's Conference on land resources in connection with the role of the University in food production, marketing, and distribution.

Albert Z. Guttenberg

Hello again out there. The setting here is quite different from what most of you remember. We miss Scott and Lou who are no longer on the scene, having retired. On the plus side there is the bracing (and slightly scary) company of an amazing school of leaping, snapping junior colleagues who have swum in in the past few years. Trying to emulate their antics, I myself have been jumping around this year more than is my wont, attending conferences (Rochester, N. Y., Toronto, Tucson), giving papers, publishing and perishing, etc. I'm looking forward with gusto to a possible sabbatical about which I hope I'll be able to tell you more next year.

Leonard F. Heumann

Hello alums. It's hard to believe it's been almost seven years since I started teaching at Illinois. I just returned from the ASPO Conference in San Diego and met former students from six of those seven years. It's been a busy year for the Heumanns. Rob is in nursing school and doing very well. Sarena is now 9 and deeper into ballet than ever. She was in two big productions at the Krannert Center this year--The Nutcracker and Midsummer Night's Dream. Aaron is almost 6 and doing beautifully in school--learning to read and particularly excelling in arithmetic. I have had four research grants this year ranging from the study of neighborhood organization to modeling housing and support service needs for functionally disabled elderly.

It is clearly publish or perish time for me as I was not granted promotion and tenure this year. I will have to either crank out a number of journal articles in this coming year or find new employment. I am frankly not sure which way I will go. This summer will be a time for major career decision-making in the Heumann household.

Andrew M. Isserman

This has been an exceptionally fine year. Ellen Jacobsen (MUP '74) and I became engaged on October 4 on a moonlit night at Lake of the Woods. Finally, Ben has a mother! He is flourishing from the all-around better diet at 910 South First Street. My "see this continent campaign" continued this year with trips to Toronto; Tucson; Los Angeles; Boston; Keystone, Colorado; Pittsburgh; Oxford, Ohio; and San Diego to present papers and to Mexico with Ellen for a practice honeymoon. Remember if you need help doing impact analyses or population projections or other types of planning analysis, we have well-trained students here who will be looking for internships and jobs soon.

T. John Kim

Greetings to all friends and alumni. I became the newest member of the "family" in August 1976. My new life in the Midwest (where I am living for the first time) has led me to become a student of the science of "Muddling Through." I found that I have had to make many complex decisions in settling myself and my family in this new area, and having lost confidence in the rational-comprehensive decision-making process, found myself becoming an incrementalist, hoping that the resultant decision was not disjointed.

Location theory helped me in searching for our new home, but I had to abandon the principle of minimization of transportation cost. When I had to allocate my scarce resource (time - what else for a new faculty member?) among duties as a head of household and as an academician, I had to assign a zero cost to teaching and an infinite cost to my family duties. The result was quite obvious, although I didn't employ linear programming to attain this.

Nostalgia for valleys, rivers, mountains, and polluted beaches have made me an environmentalist, although I wouldn't mind seeing a healthy growth of the

pizza industry, particularly to produce the thin pizza I used to enjoy on the East Coast.

But I love the clean, bright, blue sky here after a stormy wind. I love the friendly people here and I love my office on West Nevada. And, of course, I love to eat at the Manna Korean Restaurant! I enjoy teaching the Introduction to Transportation Planning, the Comprehensive Planning Workshop, the Transportation Planning Workshop and the Survey of Regional Planning course. I am trying to combine my academic background and practical experience (perhaps I should say more simply "theory and practice"?). However, I am still driving a car, although I am one of the strongest advocates for Mass Transit.

Despite all of my struggles in making decisions, I am very happy to have achieved a number of things. Michael Romanos and I submitted a grant proposal to the U. S. Department of Transportation hoping to bring some money to the Department. I presented a paper to the 23rd North American Meeting of the Regional Science Association at Toronto, titled "Alternative Transportation Modes in an Urban Land Use Model." I am writing a research paper titled "Effects of Subways on Urban Form and Structure." With my ten industrious students, I am analyzing Mass Transit Services in Urbana-Champaign area, using Urban Transportation Planning System (UTPS) package program. I was able to invite Professor Alain Kornhauser of Princeton University to my class. He gave us a talk on "Automated Guideway Transit System." I hope I can keep inviting many prominent academicians and practitioners to visit us--if funds permit!

As a member of the Technical Advisory Committee for Illinois Environment Protection Agency (IEPA), I haven't missed a single meeting, although we have met only once so far!

I hope things will be much easier for me next year. Then I may be able to plan more effectively for myself, for my family, for my courses and most of all for the benefit of Urbans and Regions wherever they may be.

Next year, I may be a "Mixed Scanner."

Carl V. Patton

This year saw several major events for the Pattons. We moved to a new home. (I doubled my commute distance. We now live two blocks from the DURP.) Jane and John learned to swim. I was awarded the Ph.D., and I was appointed to head the Bureau of Urban and Regional Planning Research.

This was also a big year for travel. We spent last summer in Berkeley where I had a summer appointment at the School of Public Policy, and I traveled to a dozen sites for a research project on early retirement sponsored by the National Science Foundation. I also gave papers in New York and Denver.

Michael C. Romanos

It is good to know that some of you who will read our news this year, have

actually been my students, and do not wonder who this stranger is. As a matter of fact, I know that many of you out there are already making more money that I do!

Those of you who have taken 171 in the past, or have experienced the frustrations of being teaching assistants in that class, would like to hear that the course has undergone considerable changes. Last Fall we experimented with a number of planning simulations drawn out of case studies from Champaign and Chicago. These simulations were the result of work that I completed last summer with the help of Bob Begg, and with the financial support of an Undergraduate Instructional Award from the Office of the Vice Chancellor for Academic Affairs. Throughout the fall semester, alert undergrads were simulating everything--from the annexation of the Market Place shopping center, to the decision concerning construction of the Chicago Crosstown Expressway, and the grading curve in the course.

In addition to my teaching load in the Department, I have been involved in the development of two new educational programs on campus. In Civil Engineering, where I hold a joint appointment, I have worked closely with other faculty in organizing the Transportation Planning program, in which the two Departments are working in close consultation. In addition, I have participated in the development of two new experimental courses, offered through the Office of West European Studies, and drawing from many academic units on campus. During the fall semester, we taught a course on the problems of Western European Cities, while this spring we offered a course on urban and rural social policies in Europe.

This year added a new interest to my research activities. For several months now I have been doing research, and have presented several papers on the energy conservation potential of communities and transportation systems. A large optimizations model of the energy consumption of urban areas is in the making as part of my energy/land use modeling seminar, and a voluminous report outlining research priorities for U. S. ERDA's Community Systems Branch was submitted in January and is being published by the U. S. Government Printing Office.

In other research fronts, my book on Residential Spatial Structure was published by Heath-Lexington last May; I received, and am working on a research grant from the Office of University Research, on the problems of rural passenger transportation in Illinois; and have been editing two books, which will hopefully be published within the year.

Mary A. Vance

I retired in May after serving for many years as the City Planning and Landscape Architecture Librarian. For the time being, Mary Lou Wigley is acting as temporary librarian. A search committee, consisting of Bill Goodman; Barry Checkoway; and the librarians from Biology, Law, and Geography, are in the process of finding a permanent librarian. I am sure they will find a good replacement.

FACULTY EMERITI

Scott Keyes

Since retiring in September last year, I have continued to work on my major interest in the planning field, namely, the establishment of a unified, cooperative federal-state-local planning system centered on the formulation and implementation of growth policy.

So far I have drafted a bill which I hope will eventually be introduced in Congress. This bill is essentially an update and extension of the "Balanced National Growth and Development Act of 1974" introduced by Senator Humphrey. I have circulated my new draft, and have gotten a lot of good comments, some from official sources in Washington and Springfield, and some from former students. I plan to circulate these comments to everyone who has expressed an interest, and to do a second, revised draft of the bill at an early date.

I have also continued work on another of my major interests, improved techniques for comprehensive planning at the substate district level, particularly the device which I have been calling the "Areawide Advisory Budget." These two projects are interrelated in that the AAB would help local governments to participate in a meaningful way along with the federal and state governments in the development, monitoring and periodic updating of national growth policy.

It is obvious that changes will be coming about in Washington, and given President Carter's background and interests, I think the outlook for significant developments in our field is good. A lot of us probably think we know what the direction of movement ought to be. What it will actually be remains, of course, to be seen.

Louis B. Wetmore

Since last May, when we saw so many alumni at the retirement parties, the days and months have been characterized as a combination of leisure activity and gained perspective. Sebastian de Grazia thoughtfully defined leisure as time freed up for constructive activity not otherwise possible.

I have read many books at whatever pace seemed most appropriate (sometimes three or four books at a time). I gained special perspectives from the biography of Oliver Wendell Holmes, "Yankee from Olympus," and "The American Commonwealth" by James Bryce.

Writing in the 1880's Bryce shows remarkable insight into the significance of public opinion and the party system in public decision making. The biography of Holmes gives an understanding of the human background for the judge's great decisions and dissents. The Supreme Court and its role have always interested me because so many of the issues are essentially ethical problems to be disposed of under the professional guidelines of law.

To a limited extent my many files have been sorted into major categories. The University Archivist, Maynard Britchford, endorsed a chronological approach which I find sympathetic to my own emphasis on historical perspectives.

Four broad perspective papers have been dictated and are now being reconsidered as possible conceptual frameworks for the file materials. Bad weather days are of course the best days for working on files, but this past year has seen only the very bad weather of January as a concentrated period for being indoors. We follow the weather forecasts carefully since we plan to be out of doors or on short trips as often as the weather permits.

The month of January was so unpleasant that we pulled up stakes on January 30th and spent four weeks in Florida. Our two weeks on Sanibel Island, near Fort Myers, were completely free of snow, but contrary to the travel posters, we found swimming possible, but only enjoyable in a heated pool. Shelling on the beaches and visiting the wildlife refuges were very successful.

The best part of retirement is freedom to do whatever the time of year and today's weather make enjoyable. A very different sense of "calendar" emerges and therefore a different perspective on time.

THE BUREAU

by C. V. Patton) As some of you may know, I was appointed director of the ureau, effective the Spring Semester of the 1976-77 academic year. John uinn was appointed as assistant director. I will keep this note short on romises and hope you will see and hear what we plan to do during the next ear.

was assigned to direct the Bureau with the intent of strengthening our orga-ized research program. We have begun to do that, with several research pro-osals having been written and a number of contacts with potential research upport sources being made.

e recently completed a research project for the U. S. Army Corps of Engi-eers. In this study we analyzed alternative management, operation and/or isposition strategies for three federally-owned townsites. The towns were uilt in the 1930's to house construction workers and were to be disposed of hen the dams were completed. However, the towns were not disposed of and ach now houses about one-tenth of its boom population. (Watch for an an-ouncement of this publication to learn about our recommendation.)

n addition to mounting a research effort, we plan to expand the continuing ducation program developed by John Quinn. In addition to the four events we ow run (the Summer Institute on Zoning and Planning, the Basic Community lanning Course, the Basic Industrial Development Course, and the Winter Con-erence), we hope to offer an advanced course, perhaps in conjunction with the asic Community Planning Course. In this regard, John Quinn obtained a grant rom the State Department on Aging to run a conference on planning for older ersons. The conference will be held at the Allerton House in April.

ther things we would like to do include finding a way to bring practicing rofessionals to campus to carry out research through the Bureau and to teach n the Department; and to offer a research and reference service, perhaps or-anized and run by students. We are also taking a hard look at our publica-ion program, and we may try to publish more guides and manuals.

ur major effort so far has been to get organized, to make contacts, and to rite proposals. Next year, we hope to report upon our progress.

LEASE NOTE: See the important announcement on the separate, colored page.

THE STUDENTS

(by Ken Tichacek) The life of a student at the big U has changed little since the days even the oldest of you tromped across the quad. Even though Ebenezer Howard has yielded somewhat to Paul Davidoff, classes in computer programming have replaced drafting workshops, and Prehn's Bar has become Treno's, the activities and attitudes of DURP students probably remain substantially unchanged. The student years are still frenzied ones, alternating between periods of intense, hard work and intense play.

This past year, intense play took place primarily in the form of parties and athletic contests. Recent alumni will be proud to hear that the DURP intramural football team continued in its historic role as the worst on campus. In fact, this past season was nearly perfect--the DURP Turkeys did not score a touchdown until a fluke play in the final game of the season. Not to be outdone, the women's basketball team actually did play a perfect basketball game, losing 12-0! The socio-athletic highlight of the year was the 2nd annual 1st year/2nd year graduate basketball game. Luckily for our damaged psyches a DURP team had to win that one, and the 2nd year did. The party year was handled more competently by DURP students. It began with a Labor Day picnic, continued through Halloween masquerades, keggers, impromptu afternoons at Treno's, and culminated in a graduation banquet at the Levis Faculty Center.

Academically the year was equally frenzied. Workshop groups focused on issues ranging from redlining to long-range development planning and made presentations to the Champaign County RPC and a number of city councils around the state. Second-year students became, as usual, increasingly consumed in their work on Master's Projects as the year wore on.

The DURP students would like to congratulate those of our number who were honored in this past year for academic achievements. They include Lillian Lyons (BUP) who received the Karl Lohmann Award for professional promise; and Leo Sterk (BUP) and Vince Musto (MUP) who received AIP awards for academic excellence.

DURP students engaged in a number of "extracurricular" activities as well. Two DURPies are members of the Urbana-Champaign Senate, while others are in leadership positions in groups such as Students for Environmental Concerns. Internally, the Student Planning Organization is being resurrected, and once again is becoming a visible force in departmental decisionmaking.

That, in a nutshell, is the student year that was. As you can see, it is probably not much different than when you were here. It is the hope of the students and their faculty mentors that the activities of this past year will have contributed to their development as planning professionals. To what extent that is true remains to be seen, but one attribute was surely developed--stamina.

GRADUATE STUDENTS

PAUL ASABERE, B.S. in Planning, University of Ghana.

TERRY BALL, B.S. in Earth Science, M. S. in Teaching of Earth Science, Indiana State University.

SUSAN BARCLAY, B.S. in Art Education, Loyola University.

TIMOTHY BEEBLE, B.A. in Sociology, University of Michigan.

MYLES BERMAN, A.B. in Liberal Arts and Sciences, University of Illinois at Urbana-Champaign.

MARK BOAZ, B.A. in Sociology, George Washington University.

MARILYN CATLIN, A.B. in Liberal Arts and Sciences, University of Illinois at Urbana-Champaign.

WARREN COOK, B.S. in Urban Studies, Michigan State University.

JANET CRAWFORD, B.A. in Sociology, Millsaps College.

DAVID DAI, B.Arch., College of Chinese Culture.

MARY DIMIT, B.S. in Liberal Arts and Sciences, University of Illinois at Urbana-Champaign.

MARTHA ELKUS, B.A. in Political Science, American University.

ANN ELLIS, M.A. Ordinary in Geography and Economic History, University of Edinburgh.

MARGARET ERIKSON, B.A. in Anthropology, University of Illinois at Urbana-Champaign.

JOHN FINKE, B.A. in History, University of Washington.

ROBERT FOERTSCH, B.S. in Sociology, Illinois Institute of Technology.

BARBARA FOSTER, B.A. in English, Principia College.

HOWARD GOLUB, B.A. in Political Science, Bradley University.

GUY GRONER, B.U.P., University of Illinois at Urbana-Champaign.

STEVEN GROSSMAN, B.S. in Liberal Arts and Sciences, University of Illinois at Urbana-Champaign.

SHIRLEY HALLARON, B.A. and M.A. in Geography, Eastern Illinois University.

TERRENCE HAMILTON, B.A. in Political Science, University of Texas at Austin.

JANINE HATMAKER, B.A. in Government, Idaho State University.

MICHAEL HATMAKER, B.S. in Government, Idaho State University.

AI-LI HWANG, B. of Municipal Administration, College of Chinese Culture.

ELIZABETH KATSAROS, B.A. in American Studies, Knox College.

CHING-FUNG LIN, B.S.E., National Chen Kung University, Taiwan.

KAREN MAJORS, A.B. in Political Science, University of California at Davis.

MICHAEL MANEY, B.S. in Geography, Illinois State University.

ROGER MARSHALL, A.B. in Sociology, University of Illinois at Urbana-Champaign.

MARABETH MARTIN, A.B. in Political Science, University of Missouri at Columbia.

LAURA MERKIN, B.S. in Architectural Studies, University of Illinois at Urbana-Champaign.

SCOTT MICHIE, B.A. in Sociology, Beloit College.

THERESE MIERSWA, B.A. in Urban and Environmental Studies, Case Western Reserve University.

BRIAN MILLER, B.A. in Economics, State University of New York at Albany.

ROSS MILLER, B.S. in Journalism, University of Illinois at Urbana-Champaign.

BARBARA MOLINA, B.A. in Liberal Arts, Northeastern Illinois University.

MARY NIEBLING, B.A. in Urban Studies, Lawrence University.

DONALD NIEMANN, B.A. in Design, Southern Illinois University at Carbondale.

MICHAEL O'DONNELL, A.B. in Political Science, St. Joseph's College.

JOHN PAGE, B.S. in Urban Planning, Iowa State University.

MARY PECK, B.A. in Urban Affairs, University of Evansville.

PATRICIA PETRIE, B.A. in Chemistry, Psychology and Zoology, University of Colorado at Boulder.

GREGORY RABB, B.A. in Political Science, Canisius College.

KIRSTEN REEDER, A.B. in Liberal Arts and Sciences, University of Illinois at Urbana-Champaign.

SUSAN REES, B.A. in Journalism, Marquette University.

ROBBI RICE, B.S.H.E., University of Arkansas at Fayetteville.

CAROLYN SANDS, A.B. in History, University of Illinois at Urbana-Champaign.

THOMISENA SEWARD, B.A. in Social Studies, Voorhees College.

DONALD SHANE, A.B. in Urban Studies, Miami University (Ohio).

DAVID SIMON, B.A. in Economics, State University of New York at Albany.

FURLONIA SMITH, B.S. in Sociology, Tuskegee Institute.

PARVEEN SOOD, B.Arch., University of Delhi; M.Arch., University of Illinois at Urbana-Champaign.

KUO-LON SOONG, B.S. in Agriculture, National Taiwan University.

KENNETH STABLER, B.A. in English, State University of New York at Buffalo.

ROYA-LEI STANLEY, A.B. in Geography, University of Illinois at Urbana-Champaign.

MICHAEL STEELE, B.S. in Human Environmental Planning, Governors State University.

DONNA STIMPSON, B.A. in Psychology, Newton College.

RANDALL SUKO, B.A. in Political Science, Central Washington State College.

RONALD SUNDELL, B.S. in Business Administration, University of Illinois at Urbana-Champaign.

NUNTANA SUWANAMALIK, B.Arch., Chulalongkorn University, Bangkok.

GREGORY THORNBURY, B.S. in Natural Resources, Purdue University.

KENNETH TICHACEK, B.Arch., Illinois Institute of Technology.

MARVIN TICK, A.B. in Political Science, University of Illinois at Urbana-Champaign.

RONALD WALKER, B.S. in Food and Resource Economics, University of Massachusetts at Amherst.

KENNETH WESTLAKE, B.A. in Urban Policy, Michigan State University.

THOMAS WHITESIDE, B.Arch. and B.F.A., University of Illinois at Urbana-Champaign.

ANTHONY WOOD, B.A. in History, Kenyon College.

HASSAN ZAIDI, B.Arch., West Pakistan University of Engineering and Technology.

UNDERGRADUATE STUDENTS

DAVID BEHR, Waukegan, Illinois, Senior.

PAMELA BERNAS, Chicago, Illinois, Sophomore.

DAVID BERTRAM, Aurora, Illinois, Junior.

LEE BROWN, Highland Park, Illinois, Senior.

CRAIG BURNS, Springfield, Illinois, Junior.

DANIEL CARMODY, Oak Park, Illinois, Junior.

DANIEL CROWE, Naperville, Illinois, Sophomore.

ALBERT DAROSZEWSKI, Chicago, Illinois, Junior.

JUDITH DEVITT, Chicago, Illinois, Junior.

CARLOS DONALDSON, Urbana, Illinois, Senior.

MICHAEL DOYLE, Chicago, Illinois, Junior.

JEFF DRUMTRA, Glen Ellyn, Illinois, Senior.

LAURA ELLIOTT, Kewanee, Illinois, Sophomore.

ADRIAN GARCIA, Chicago, Illinois, Sophomore.

REBECCA GENNARO, Tolono, Illinois, Senior.

JOHN GROVES, Westchester, Illinois, Junior.

NANCY GUNDERSON, Peoria, Illinois, Junior.

THOMAS HAYES, Rockford, Illinois, Junior.

MAUREEN HIGGINS, Chicago, Illinois, Junior.

GREGORY HILL, Glen Ellyn, Illinois, Junior.

HAROLD JENKINS, Chicago, Illinois, Senior.

ELIZABETH JOHNSON, Clarendon Hills, Illinois, Junior.

BETH KAHN, Chicago, Illinois, Senior.

DANIEL KENZIE, Homewood, Illinois, Sophomore.

AVON KILLION, Urbana, Illinois, Senior.

MATTHEW KLEIN, Brookfield, Illinois, Senior.

THOMAS KOENIG, Arlington Heights, Illinois, Senior.

KENNETH KURTZ, Downers Grove, Illinois, Senior.

KEITH LARSON, Hinsdale, Illinois, Sophomore.

WILLIAM LENSKI, Geneva, Illinois, Senior.

MYREEN LEVENSHON, Chicago, Illinois, Senior.

DAVID LEVIN, Niles, Illinois, Junior.

GREG LINDSEY, Huntley, Illinois, Senior.

MICHAEL MACZKA, Chicago, Illinois, Sophomore.

DAVID MATHEWSON, Joliet, Illinois, Sophomore.

THOMAS MAZZETTA, Highwood, Illinois, Senior.

GREGORY MC DANIEL, Champaign, Illinois, Senior.

PAUL MILLER, Waukegan, Illinois, Junior.

PETER NICHOLSON, Chicago, Illinois, Junior.

SANDRA PAULL, Highland Park, Illinois, Senior.

MEGAN PETERSON, Urbana, Illinois, Sophomore.

RAHN PFEIFER, Barrington, Illinois, Junior.

IRENE POULSEN, Champaign, Illinois, Junior.

DENISE RENCHER, East St. Louis, Illinois, Junior.

LOIS ROCKER, Champaign, Illinois, Junior.

JON RODGERS, Tercebia, Azores, Junior.

DAVID SELLERS, Chicago, Illinois, Junior.

ANTHONY SMANIOTTO, Tinley Park, Illinois, Sophomore.

MICHAEL STANTON, Chicago, Illinois, Sophomore.

LEO STERK, Worth, Illinois, Senior.

MARK SWISLOW, Chicago, Illinois, Senior.

PATRICE TRACY, Park Ridge, Illinois, Sophomore.

DAVID TUCKER, Lincolnwood, Illinois, Junior.

MINDY TURBOV, Skokie, Illinois, Senior.

BRUCE WALDEN, Clinton, Illinois, Senior.

SCOTT WALTHIUS, Hinsdale, Illinois, Junior.

FELICIA WRAGG, Hong Kong, China, Sophomore.

MARCI ZEISEL, Peoria, Illinois, Senior.

SCOTT ZIEGLER, South Elgin, Illinois, Sophomore.

IN MEMORIAM

We are sad to report the recent passing of two distinguished alumni. Mr. Jerral T. Harper (1951 DDSWV, 1952 MSCP) died suddenly in Chicago on February 15, 1977. Mr. Harry Duke Freeman (1923 BSLG) died on January 22, 1976 in Sacramento, California.

Mr. Harper was the Assistant Commissioner in charge of planning with the Chicago Department of Development and Planning, a position he held since 1966. Prior to that Mr. Harper had worked for the Community Renewal Program in Chicago; the Chicago Department of City Planning; the Metropolitan Planning Commission of Knoxville and Knox County, Tennessee; and the Tennessee State Planning Commission.

Mrs. Erna C. Freeman writes of her husband, "Mr. Freeman was a former City Planning Director for the City of Portland, Oregon, and Executive Director of the Portland Housing Authority during World War II. He was a member of the American Institute of Planners and the American Society of Planning Officials. He retired in February of 1967 as Deputy Director of Planning, California Department of Public Works, Sacramento. Mr. Freeman was an avid golfer and a charter member of the Valley Hi Country Club in Sacramento. He was also a member of the Scarab Fraternity Karnark Temple, at the University."

On behalf of the department and its alumni, we offer our sympathy to the families of both Mr. Harper and Mr. Freeman.

Seattle, WA 98124

Home: 5530 194th Avenue, S. E.
Issaquah, WA 98027

I worked for the Federal Housing Administration and later the Dept. of Housing & Urban Development until 1973 as Landscape Architect-Site Planner. At that time I resigned to open my own office as Landscape Architect for a two-year period. I was asked then to serve as Senior Landscape Architect with the Corps' Seattle office for a period of one year to replace a man being sent to school for his Master's degree. The work was so enjoyable that I have stayed on even after he returned, and am now beginning my third year with the Corps. Most of the work is related to Visitor's Accommodations and landscape restoration at various projects in the Seattle District--Libby Dam, Chief Joseph Dam, Lake Washington Ship Canal, etc.

Last summer I got involved in a portion of the Bikecentennial trail ride, from Sun Valley to Yellowstone Park. This year looks like a bike trip from Astoria to San Francisco.

DALE R. SCHERER ('47 BFALA, '48 MSCP)
Office: Dept. of Interior
Bureau of Land Management
18th and "C" Streets, N. W.
Washington, DC 20240

The Bureau of Land Management has become more completely enmeshed in compliance with NEPA than ever before. More of its energies are being concentrated on developing responsible environmental statements. The impetus, of course, comes from the search/use of minerals for energy and their subsequent adverse impact on the environment. While the Bureau used to be more concerned with impacts on wildlife & range, they have expanded their perspective to include socio-economic effects upon local/regional/national/international areas--a significant change-over from their former parochial concerns. This has opened up employment to a greater variety of professionals.

Somehow, we have made it through the worst Winter here on record in Minnesota. On the brighter side, we were honored with a national design award for one of our Downtown improvement and renovation projects. On the somewhat humerous side, we were notified by the White House staff that Betty Ford would not be available to present the award as scheduled due to the "rigors and

time commitments" of the campaign year. As some of you are aware, we have tended to specialize in recent years on Downtown planning and, frankly, find it rather refreshing after the years of "701" planning.

I have not been employed by the Ill. Dept. of Local Gov't. Affairs since last June (1976). Since that time I have been job prospecting in Colorado--at which time I was affiliated with 40 Plus of Colorado Inc. for several months. This is a non-profit organization sponsored by the Colorado Dept. of Labor. Their mission is to assist professional people over 40 years of age in their job search activities.

I arrived back in Illinois at the end of January (1977) and am now employed in the fast food business in Springfield, Illinois. My ultimate aim is to find a planning position in industry (corporate planning or similar).

My wife and family are fine. Everyone in school and growing. A final note of interest. My oldest child--Steve--who was born while I was a student at the University is now living in Tucson, Arizona. His goal (when we last talked) was to become a student at the University of Arizona.

That's all for now!!

CARLTON CHARLES REED ('59 BSCP)
Office: Deputy Director
City Development Department
City Hall, 15th Floor
Kansas City, Missouri 64112

Home: 235 Ward Parkway, Apt. 301
Kansas City, Missouri 64112

I am Deputy Director of the City Development Department, serving Joseph E. Vitt (B.Arch., '59, U of I). Our department provides a complete range of development services, from city-wide long-range policy planning, to design and construction of curbs and gutters. We have about 130 people and an operating budget of over $8 million. We do everything within a multi-year work program, emphasizing "on the ground" development and professional growth of our planning staff.

Office: Director of Community Development
City of Colorado Springs
City Hall - Box 1575
Colorado Springs, CO 80901

I am still Director of Community Development for the City of Colorado Springs. Our planning and redevelopment efforts are going well although we could use more staff and money for the program. One program that we implemented last year might be of interest. In an attempt to involve the private sector in our redevelopment efforts we formed a local development corporation to provide a loan in a problem west side commercial area--78% of the loan provided by SBA with the balance made up from block grants. This represents a 4 to 1 private-public leverage of our funds. The program has had a real impact on

turning the commercial center around in a short time. We are also about to begin a similar program, working with the local banks and S & L's, to provide residential loans in our redevelopment neighborhoods. It is my feeling that leveraging of public with private funds is essential to the long range success of any redevelopment program due to the limited resources available to us.

This past year has been hectic as we continue to move into new fields while remaining busy serving existing clients. We have done a great deal of central city economic development work in the last year including neighborhood revitalization studies in Dayton, Buffalo, Hartford, Evansville, St. Louis and Albuquerque and a city-wide economic development strategy study for Detroit. On the home front, Amy and the kids are fine and we will move from Reston to McLean this spring after 11 years of new town living. The ever lengthening commute got me.

I recently left employment with the Irvine Co. to pursue a sole proprietor land use-governmental relations consulting business. I am specializing in assisting land development project sponsors in working their way through the governmental procedure & approval process in the Los Angeles & Orange County coastal area. With the enactment of the California Coastal Act of 1976 such a specialty in this geographic area appears challenging & timely. Further, this type of work should be more flexible for me, an important factor since I am also pursuing a law degree.

East-West Gateway Coordinating Council
112 North 4th Street, Suite 1200
St. Louis, Missouri 63102

Home: 6330 San Bonita
St. Louis, Missouri 63105

I have now had about one year as Executive Director of the East-West Gateway Coordinating Council. We are involved in some very exciting endeavors dealing with our metropolitan area. We are going through an alternatives analysis in attempting to project the type of mass transit system we will need in the next 10-15 years; we are finalizing the first Port Development Plan for our Port, which is the largest inland port in the country; we are the 208 agency for the Missouri portion of the metropolitan area, as well as the other typical functions that an MPO and A-95 Review Clearinghouse typically are involved in.

I have two sons and a wife that provide a great deal of enjoyment beyond my most challenging job. If any of my former associates pass through the area, I would certainly enjoy having them stop by.

RAYMOND C. ROBINSON, JR. ('63 MSCP)
Home: 4413 South Main Street
Akron, Ohio 44319

CARL J. SCHENK ('63 MSCP)
Office: Metropolitan Council
300 Metro Square Building
St. Paul, MN 55101

Home: 1705 Nokomis Court
Minneapolis, MN 55417

I am an environmental planner in charge of implementing the designation of the Mississippi River Corridor as a state critical area. This involves the coordination of local, state, and federal planning for metropolitan reach of the river.

My wife, Barbara, continues as a teacher's aide for the sixth year and keeps our family on an even keel.

Our sons, Peter and Tim, are now 13 and 11 years old, respectively.

Appointed in January 1977 by Dept. of State to a 4-year term as a member of the United States National Commission and a U. S. member of the Permanent International Commission of the Permanent International Association of Navigation Congresses (PIANC). PIANC, an international organization with headquarters in Brussels, Belgium, was organized for the purpose of exchanging ideas and experiences on technical features of inland waterway and port and harbor developments. Commission is composed of delegates representing more than 40 national governments. I have been invited to present a paper at the Leningrad 1977 meeting of the Conference on "The Effects of Technological Changes in Cargo Handling on the Design and Equipment of Waterways and Inland Ports." Completed in 1972 a 2-year term as Chairman of National Waterways Conference. Continue as Associate Port Director for Planning and Engineering for Port of New Orleans.

CHARLES F. LEWIS ('65 MUP)
Office: Chief, Community Planning Division
U. S. Air Force Environmental Planning Directorate
Tyndall AFB, FL

Home: 2908 Kings Road
Panama City, FL 32405

I left Fairfax County, Virginia, in March '76 to take a civilian position with the Air Force. We've recently reorganized somewhat, upgrading Environmental Planning to Directorate status. Out of this office we serve the entire AF in terms of investigational engineering, field assistance, conceptual planning, etc.; we're affiliated less formally with other groups doing R & D into related technical fields: air and water quality, environmental chemistry, etc. Good professional environment, lots of travel, nice weather. After hours I teach Governmental Planning and Programming at the base extension of Troy State University. Mary and sons Steve (11) and Danny (9) are doing fine.

I am presently practicing law in Kansas City, specializing in urban and land use law and in the development of growth management systems for cities and counties around the country. A major area of my work is for a planning consulting firm located here in which an interdisciplinary approach is used with me providing the plan implementation mechanics and legal techniques. In this regard, I have worked on traditional zoning and subdivision regulations as well as neighborhood planning, rehabilitation and code enforcement, growth management planning and state airport systems planning projects. The diversity has been educational and the work itself rewarding.

My wife is on a leave of absence from her teaching career and is at

home with our 18 month old daughter.

Northampton, MA 01060

Job continues to be interesting; Northampton is a nice, quiet town but a little backwards sometimes. We have a new daughter to expand our family--named Amy, but not after Amy Carter. Vicki, Jeffrey, Amy, and I just went to the AIP Running Policy Conference in Washington where I saw a few old friends. I would like to see more practicing planners take an active role in AIP, as I feel we must stick together more to get our ideas across. Call if you are going to be in the area.

JOHN G. PICKARD ('69 MUP)
Office: Barton Aschman Assoc. Inc.
1730 K Street, NW
Washington, DC 20006

In the summer of 1975 my family and I returned to England, after 7 years in the U.S.A. My work was largely in the Middle East, but the prospects for planning consulting and for the UK economy as a whole are grim. We stuck it for 18 months before deciding to cut our losses and return to the U.S.A. I have rejoined my old firm of Barton-Aschman as Senior Associate.

San Francisco, CA 94106

Home: 1434 Grand View Drive
Berkeley, CA 94705

This past year, I dropped back into school for a while and completed work on my MCP at Berkeley. I'm now working as a land use planner for PG & E, the utility that serves most of northern California. I'm part of a newly formed group that is preparing community land use and population projections. These projections are being used as the basis for determining future energy needs at the local level. And for sizing the required facilities. I'm finding that the work draws on my many interests, and provides me with a nice overview of the California planning scene.

DAVID E. CARLEY ('70 MUP)
Office: 2060 City-County Building
Indianapolis, IN 46204

Home: 586 Antioch Road
Mooresville, IN 46158

Utilizing 26 person-years of education and work experience in urban affairs, my wife and I moved to a small farm about a year ago. Our intent is to become fulltime farm operators over the next five years. In the meantime Judy works for Lilly Endowment while I work with a group called the Greater Indianapolis Progress Committee, Task Force on Urban Growth and Revitalization. The name is probably longer than the job. Must close now as it is time

to feed the cows. I should have known better than to attend an urban planning school in the shadows of the longest continuous agricultural testing plots.

1010 Ridge Road, P. O. Box 1720
Gainesville, GA 30501

Home: 1029 Lakemont Drive, NW
Gainesville, GA 30501

In October, 1976, I became Planning Director of the Georgia Mountains Area Planning and Development Commission--the first and only female planning director of a Georgia APDC. However, unlike Billy Carter, I have not had to hire an agent as yet. Our APDC covers 13 counties with 52 member governments. Since 12 of our counties are in Appalachia, the reduction in federal funds has not disseminated our operation; but we are feeling the pinch. I enjoy the annual newsletter very much and am looking forward to receiving news of other alumni and the department.

We are both busy working on the Phoenix Urban Form Directions program, the update of the comprehensive plan, and coordinating this effort with the regional council of governments' land use and housing elements which are also being prepared. Joy is teaching her second evening course at Arizona State University. The course covers the role of the public sector in housing. Gardening, home improvements, our talking parakeet, and learning to sail our new boat fill up our leftover time.

State Education Building Annex 1067
Albany, NY 12234

Home: 16 Alden Road
Poughkeepsie, NY 12603

I am still working for the New York State Geological Survey on a National Science Foundation funded project. In October I was promoted to Project Director and thus have been very involved in designing the study and in its execution. The project is evaluating the impact of Natural Resource Information in Land Use Decision Making in both New York and Connecticut. We are also studying current and proposed land use and environmental legislation on the state and federal level and the impacts on local and county public decision makers. In addition we are doing a cost-benefit feasibility study of an automatic Data Processing System. The study is extremely interesting and is a challenge to me. In May I was married to Daniel Stone, a civil engineer with the New York State Department of Health Division of Pure Waters.

If anyone is in the Albany area I hope you stop in to visit.

SIDNEY M. FUKE ('71 MUP)
Office: 25 Aupuni Street
Hilo, HI 96720

Home: 152 Akea Street
Hilo, HI 96720

The political process here requires the Planning Director to be appointed by the Mayor and confirmed by the Council. After two months of debate, the Council voted to deny confirmation of the Director. I am now Acting P. D., and the Mayor will hopefully be submitting my name for confirmation in March. My advice to all aspiring public planners--never underestimate the strength of politics in the planning process.

Madison, WI 53711

It's been another good year in Madison. We are just winding up our initial 208 plan (due by 12/31/77), and find ourselves nervously awaiting an influx of supplemental planning money from EPA. As many of you know, the 208 money has not been flowing freely, and I fear it won't arrive before our project term staff find other employment and we lose some of our forward momentum. As for family matters, Marlene is considering entering Law School at the UW in 1978, and I am considering entering the UW URPL Master's Program on a part-time basis. After two years in Madison, we've decided that it is a great place to live and we would like to spend at least a few more years here. Although no one except my Dad has taken me up on it, I'm going to make that standard annual invitation again--if you're in the area, contact me and we'll do our darndest to get together.

Chicago, IL 60601

Home: 531 Michigan
Evanston, IL 60202

Here at the Department of Local Government Affairs we have developed a role playing game to demonstrate the need for low- and moderate-income housing to citizens and local officials in suburban areas. It works. Please contact me for details if you'd like to use this approach in your metropolitan area.

Otherwise, I'm embroiled in a tough fight to be elected Alderman in Evanston's third ward on April 5. It's not easy challenging an incumbent. But, win or lose, it's one hell of an experience.

With any luck, I'll be publishing a book or monograph on socially-informed planning and the use of social impact analysis before the end of the year.

After much debate the County's first land use plan was adopted a year ago, so now we're just about ready to revise the 1957 Zoning Ordinance. I have also been wandering through the world of higher finance by working on the county's first formal Capital Improvements Program--everything we do seems to be a first for York County. If anyone is planning a post-bicentennial trip to Williamsburg, you're welcome to drop in.

Winter Park, FL 32789

Well, I've gone from being a public defender, to a small law firm, to a large law firm. I am now doing a lot of trial work, especially in the personal injury area. Unfortunately the closest I come to urban planning is trying to figure out what happened when two people collide in an intersection.

CHARLES DONALD WIDELL ('72 MUP)
Office: METROPLAN

Home: 1410 NE 63rd
Seattle, WA 98115

This November I at last finished my thesis on outdoor cafes. With that, I had completed my masters in landscape architecture at Cornell & was ready for my trek out to Seattle. I arrived here a few months ago. Having been a bit burnt out from the ordeals of graduate school & thesis, I spent my first weeks finding a place to stay, exploring the city & surrounding area, meeting people, & generally trying to find milieu here. Then, about 5 weeks ago I began my still continuing job search. Despite that unpleasantry, I'm still very happy about my move out here & am rapidly falling in love with the mountains & the Sound.

CLAUDIA BENJAMIN ('73 MUP)
Office: Chief Housing Planner
Southeastern Virginia Planning District Commission
16 Koger Executive Center
Norfolk, VA 23502

Home: 366 San Antonio Blvd., #B3
Norfolk, VA 23505

We have been busy putting together an areawide housing opportunity plan to qualify the region for bonus section 8 units, CD money, and 701 funds. Things sometimes seem to work a little backwards here--our distribution plan for Sec. 8 was fought the most by one of our central cities that wanted more than its "fair share." Since last year I have been doing human resources planning as well as housing planning. This involves working in such areas as health, social services, and substance (drug and alcohol) abuse. God only knows why they think I should have any expertise in the latter.

We are celebrating the beginning of our third year in Minnesota; and having mastered the arts of ice-fishing and dog sledding, we are determined to survive. Janie continues her advances in the business world (or at least that portion located in Minneapolis-St. Paul), while I remain steadily employed by the Dakota County Planning Department. Having joined the ranks of the landed gentry only last year, we have spent a portion of our time working on our new home. Janie has become a fanatical downhill skier, and I am trying my best to keep up. We have also purchased a small sailboat to while away the hot summer days. We would like to hear from any acquaintances passing through our area.

KERMIT C. ROBINSON ('73 BUP)
Home: 1031 23rd Avenue East
Seattle, WA 98111

Until August I had been working for the Carbondale, Illinois Planning Department. In my last year there I completed work on an inventory of all outdoor signs in the city leading to a new sign control ordinance. Other efforts concentrated on a couple difficult zoning cases and some basic environmental resource inventories for an anticipated update of the Carbondale Comprehensive Plan.

This year finds me at the University of Washington pursuing a Masters of Forest Resources with a concentration in resource planning. Since October I have been involved with a study of the recreation potential of the 150 square miles of Seattle watersheds which are presently closed to public access.

Office: Community Development Dept.
320 North 10th Street
East Saint Louis, IL 62201

Home: 450 North 6th Street
East Saint Louis, IL 62201

I would like to commend myself for being able to work in the planning capacity for over 2 1/2 years. Our area is in need of good, sound planners (city, urban or regional) because the area is located next to a reasonably large urban center--St. Louis. The opportunities for employment grow slimmer each day in East St. Louis alone, but the surrounding neighborhoods provide better jobs, etc. I wish everyone in the Department an even better year in 1977.

CATHERINE T. FREEBAIRN ('74 MUP)

Erskine, Renfrewshire
Scotland, U.K.

I'm still employed by Strathclyde Regional Council in the west of Scotland, and am completing my Master's at the University of Glasgow. Outside of this, nothing new has progressed.

ELLEN L. JACOBSEN ('74 MUP)
Office: East Central Illinois Criminal Justice Commission
1303 North Cunningham
Urbana, IL 61801

Home: 910 South First Street
Champaign, IL 61820

Of all the odd quirks of fate I am back here in Champaign-Urbana, happily working as a criminal justice planner. Most interesting to friends will be my reason for returning. Andy Isserman (see DURP faculty) and I are "planning" to be married this summer. (Ben will be best dog.) Imagine a nice social service type like me being involved with a quantitative analysis professor. Worse yet, I'm taking his course voluntarily. (I did not realize four years ago what a favor I was doing myself in advocating his hiring.)

Professionally, I have been collecting experiences in social welfare planning since graduation. Before returning to Champaign, I worked as a community planner in a racially

integrating Chicago neighborhood from August, 1974, to July, 1975, and as a planner at the Mayor's Office of Manpower (Daley, of course) from August, 1975, to November, 1976. Also, I've been active in the Illinois AIP as a state board member, trying to help that wounded giant recover.

Libertyville, IL 60048

Home: 65 South Virginia Street
Crystal Lake, IL 60014

Graduating last May from the University of Wisconsin-Madison armed with a Master's Degree in Urban & Regional Planning, I landed (dropped, stumbled into, etc.) a job as Village Planner and Housing Inspector (now there's a combination for you) for the Village of Libertyville--a town of 14,000 people situated north of Chicago. I wanted to launch my career in a small, down-home Chicago area town rather than being anchored deep in the bowels of some agency's office suite. But sometimes, as I descend into the depths of another dark, dank basement searching for Housing Code violations, I wonder if I went overboard or never got out of dry-dock. However, all is well. The planning work is starting to pile up--although Libertyville is not exactly in the vanguard of planning-oriented metropolises. My wife as of last August, Vicki, is doing fine teaching first grade at my old grade school in Crystal Lake.

Good-bye and Good Luck to everyone.

PATRICK J. GLITHERO ('75 MUP)
Office: Director
Logan County Regional Planning Commission
529 South McLean Street
Lincoln, IL 62656

Home: 403 Peoria Street
Lincoln, IL 62656

My work as director here in Logan County goes well. The realisms of a small office make the varied experiences and responsibilities most interesting. Still single.

STEPHEN D. GORDON ('75 MUP)
Office: Denver Planning Office
1445 Cleveland Place, Room 400
Denver, CO 80202

Home: 1059 South York Street
Denver, CO 80209

I am working mainly in housing and economic development. The housing planning has included doing a Housing Assistance Plan, working on a housing element of the Comp. Plan, and serving as a staff member to the Mayor's Housing Task Force. I am also on the Economic Development Task Force which is aimed at producing an economic development plan for Denver by September.

On the personal side, I just bought an 80-year-old house in the Washington Park area of Denver. My cross country skiing has not been curtailed by the snow shortage.

CONNIE LITTLE HILL ('75 BUP)
Office: College of Nursing, Rm. 821
845 South Damen Avenue
Chicago, IL 60612

Home: 2548 South Wesley, #5
Berwyn, IL 60402

I am currently working full-time as a secretary in the University of Illinois College of Nursing, and going to the School of Public Health part-time for a master's degree in public health. I will resign my position in August of this year and go to school fulltime. My husband is graduating from the University of Illinois College of Pharmacy in June this year and will be working as a Registered Pharmacist.

ROGER G. HOPKINS ('75 MUP)
Office: Principal Planner
Department of Community Development
Neenah City Hall, P. O. Box 627
Neenah, WI 54956

Home: 412 Adams Street
Neenah, WI 54956

Debbie and I made our first big investment and bought a house. Although the mortgage and taxes are keeping us close to home, it's just as well because it's an older house and needs some repairs. Debbie is going to school at UW-Oshkosh for a degree in accounting and expects to graduate in May, 1978. As for my-

self, I have enjoyed working in this smaller city (pop. 24,000) as it has given me an opportunity to work on a large and diverse number of planning assignments. We are currently working on a comprehensive plan and, as a result, I have had an opportunity to participate in a number of studies ranging from housing and land use to transportation and historic and environmental resources. Other projects I have been involved in include application for and administration of a community development block grant (housing rehabilitation and public works projects), the planning of one local bus service, and administration of our 1930 vintage zoning code (which will be rewritten when the comprehensive plan has been adopted).

LARRY D. JUSTICE ('75 BUP)
Office: Park Ridge City Hall
505 Park Place
Park Ridge, IL 60068

Home: 729 Forestview Avenue
Park Ridge, IL 60068

To all preservation enthusiasts--I have been doing a preservation study of Park Ridge that will be incorporated into our comprehensive plan. So far community reaction has been very positive.

Office: JFK Special Warfare Center
Fort Bragg, NC 28307

Home: 10103 Kensington Parkway
Kensington, MD 20795

I recently completed 6 months of training with the U. S. Army, during which I became airborne qualified. My next duty station will include training in unconventional warfare. For several years I have been interested in planning in 3rd world areas. My recent training has deepened my insight & understanding of techniques for successful democratic planning & development in poverty areas. As one critic said recently, worldwide poverty is our worst form of pollution.

ANN SCHAEFFER MOELLER ('75 BUP)
Office: Friendswood Development Co.
P. O. Box 2180
Houston, TX 77001

Home: 1855 Fountain View Dr., #132
Houston, TX 77057

I have been with Friendswood Development Company as a land planning analyst now for almost a year. We develop all types of uses from new towns (like Kingwood and Clear Lake City, Texas) to commercial complexes. The planning environment here is quite different from the Midwest. The private market, design and finance are the tests for development success, not zoning or lengthy governmental control. My husband and I thoroughly enjoy living in Texas and especially in this prosperous and young-hearted city of Houston. My husband David is a transplanted Texas entrepreneur. This year he is bringing to Houston the favorite Midwest hamburger restaurants--Maid Rites--and hopes to expand to other Southern cities soon. The Southern hospitality still exists, so you all come and visit Houston. You might end up staying!

SUSAN K. MOYER ('75 MUP)

Newport, KY 41077

Home: 8212 Kingsmere Court
Cincinnati, OH 45231

On March 6, 1977, Sandy and I had our first child, a daughter--Andrea Dawn. Thus, the job I finally landed in January of '77 came none too soon. The agency I work for is a two-county body with its own taxing authority. Until a recent rewrite in the State Statutes, all public construction projects in the area had to receive the approval of our Commission. Also, all master plans and zoning ordinances had to be in agreement with the areawide plan. The statutes have now reduced our role to one of mandatory review, with our comments being advisory in nature. The job, so far, has proven quite interesting.

JOE E. FRANK ('76 MUP)
Office: Department of Community Development
City of Naperville
175 West Jackson
Naperville, IL 60540

Home: 22 South Ellsworth
Naperville, IL 60540

Since August I have been a planner in the Department of Community Development, City of Naperville, with ever-increasing responsibilities over project and development review, urban design, and various medium and long range planning research and report writing. In fact, my desk has been designated as the spot "where the buck stops." Dawn is a claims reviewer with Metropolitan Insurance Company. We recently returned from a too brief trip to Colorado to clear our minds and lungs, and are anxiously awaiting warm weather for fishing and camping.

I have been working since April as a community organizer. (The job is supposed to last six months.) It is quite interesting, as I'm working in the area in which I grew up. This means I already have many contacts, most of whom will be quite valuable, but some of which could be less than comfortable. Today, I recognized the Vice-President of the Chicago Region's Federal National Mortgage Association in his office. I knew him as a relative of a friend, but "Homeowners" know him as an adversary. Today I accepted the task of working on a Business Redevelopment Project. I only hope I have the imagination to really do a good job --and hope that the area businessmen are very enthusiastic about it. I'm living with my younger sister in an efficiency apartment about two miles from my parents' home. It is a tight squeeze, especially as she's a painter and I keep hanging my clothes on her still-wet canvasses. But it's better than home, where my mother sings, my other sister plays clarinet (not very often) and sings, and my three youngest brothers do a combination of things, including a tuba, baritone horns, piano, and the final straw, a trap set. My father's pretty quiet.

I've started singing lessons, can get WILL-FM on my radio, and will take a ceramics class as soon as possible. Wish me luck.

VINCENT M. MUSTO ('77 MUP)
Office: Neighborhood Housing Services
932 East Main Street
Bridgeport, CT 06608

Home: 412 Boston Avenue
Bridgeport, CT 06610

As of January 15, I've been the Executive Director of N.H.S. of Bridgeport. Our program works in the Upper East Side of Bridgeport, a moderate income, ethnically diverse

neighborhood. By stimulating cooperation between residents, lenders, and government officials, NHS works to reverse disinvestment in the neighborhood and improve housing quality.

The job is extraordinarily challenging and requires long hours, but it's just what I was looking for.

Bridgeport is a fascinating city, I like Connecticut, and I'm close to a number of friends in N. Y. City. All of which means I'm very satisfied being here.
